I've only very briefly talked about the Unification of Germany before, so I plan to give another proper explanation of Germany's closet big brother, his many other big brothers, and that young master who almost became a big brother but didn't. For now, you can look forward to his reckless big brother's upcoming appearance

Also, the title image of this week's comic is Hellogabalus the cross-dressing emperor from Syria

With all these new historical figures in Jump+ I plan to write about their battles once I have featured all the countries involved The bosses in the Spanish Armada vs England battle are very interesting!
